

# VOLVO QUICK GUIDE - RSE

WEB EDITION

## REAR SEAT ENTERTAINMENT SYSTEM

Your car is equipped with an exclusive multimedia system.

The Rear Seat Entertainment system augments the car's normal audio system with:

- Two TV screens
- A/V-AUX input that enables the connection of e.g. video or games console
- Wireless headphones
- Remote control

This system makes it possible to watch video, play back music, listen to radio, watch TV\* or connect other external devices (e.g. a games console).

The system can be controlled from the front TV screen (parental control).

Further information on the system is available in the normal owner's manual for the car in the chapter, "RSE - Rear Seat Entertainment system".

Volvo retains the right to make modifications without prior notice.

Options are marked with an asterisk (\*)

<sup>A</sup> The function is not available in the rear TV screens.

**1** Scroll wheel, corresponds to **TUNE** in the centre console.

### OPERATION

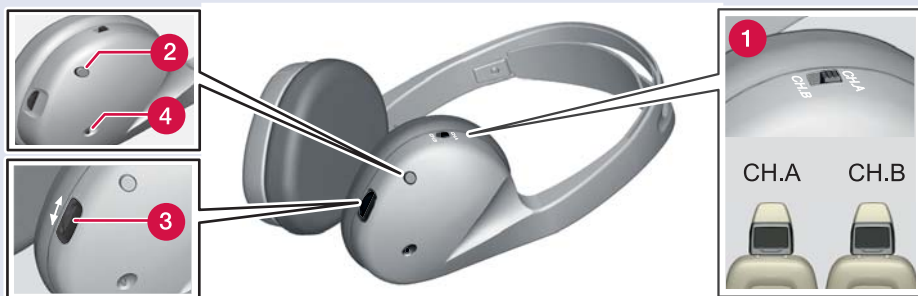

The remote control can be used for all functions in the infotainment system, including the front TV screen. To use:

1. First press the button  to select TV screen.
2. Then aim the remote control at the TV screen.

### **WARNING**

Store loose objects such as mobile phones, cameras, remote controls for accessories, etc. in the glovebox or other compartments. Otherwise they may injure people in the car in the event of sudden braking or a collision.

## AUDIO SYSTEM

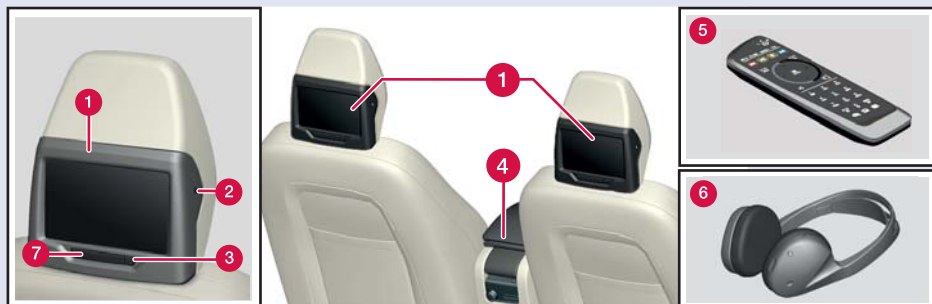

You can listen to the system's wireless headphones or you can plug your own headphones into the headphone jack.

The wireless headphones are activated with the **On/Off** button (2), an indicator lamp illuminates (4). Select **CH.A** (channel A) or **CH.B** (channel B) using the control (1). Adjust the volume using the volume control (3). The headphones are automatically switched off after about 3 minutes if they are not used.

### HEADPHONE JACK IN HEAD RESTRAINT

The volume is adjusted with the remote control.

## SYSTEM OVERVIEW

- 1 TV screen
- 2 Headphone jack
- 3 On/Off button
- 4 USB port, AUX and A/V-AUX inputs

- 5 Remote control
- 6 Headphones
- 7 IR receiver/transmitter

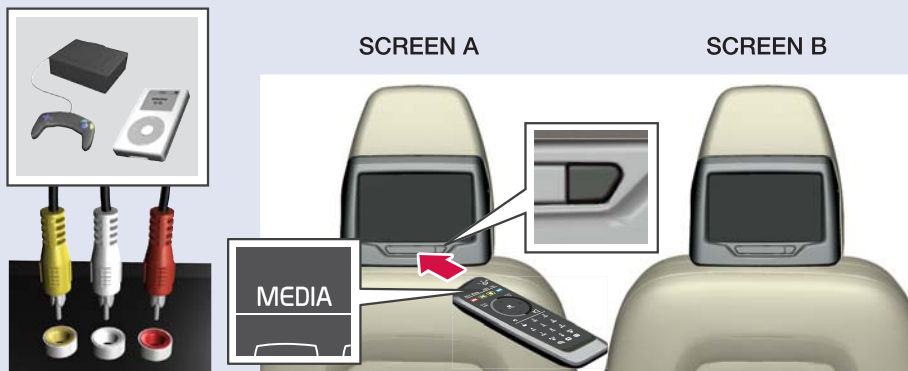

For media player and 12 V socket, see the owner's manual for the car.

## ACTIVATING TV SCREEN AND HEADPHONES

Switch on the rear TV screen by pressing the On/Off button on the TV screen.

1. Switch on the wireless headphones, select **CH.A** for left-hand TV screen or **CH.B** for right-hand TV screen, or plug the headphones included into the headphone jack on the side of the head restraints.
2. Select the required TV screen to be controlled by button  $\text{L} \text{R}$  on the remote control.

## PLAYING BACK AUDIO/VIDEO VIA THE A/V-AUX INPUT

### CONNECTING DEVICES VIA A/V-AUX

External devices, such as a game console, can be connected via the A/V-AUX input.

- Yellow connector – video cable
- White connector – left-hand audio channel
- Red connector – right-hand audio channel

Connect the equipment to the electrical socket if it is designed for 12 V.

Always follow the external equipment's instructions when connecting.

### PLAYING BACK AUDIO/VIDEO VIA THE A/V-AUX INPUT

1. Aim the remote control at the IR receiver on the TV screen and press repeatedly on **MEDIA** to the source **A/V-AUX**, release and wait a few seconds and the selection is accepted.
2. Switch on the connected device and press **PLAY** or equivalent on the connected device.

## LISTENING TO MUSIC AND RADIO/WATCHING VIDEO
