ROAD AND TRAFFIC INFORMATION - RTI

Volvo’s navigation system is a traffic information and road navigation system developed by Volvo. The system guides you to a destination and gives information along the route. It informs of situations that can affect the drive, such as accidents, road works and shows alternative routes.

It is possible to create an itinerary, search for facilities along the route, store special places etc. The system displays the car’s exact position and in event of a wrong turning always corrects to guide you to the destination.

You will see just how intuitive it is to use. Try it out. In order to get along with the system we recommend that you familiarise yourself with the information in this manual.

By facilitating accessibility and shortening driving distances, Volvo’s navigation system contributes to a better environment.

GET TO KNOW YOUR NAVIGATION SYSTEM
01 Get to know your navigation system

Manual

General information on the manual
The manual describes general functions for all markets, but market specific information may also be included.

Like the system, the manual is divided into Easy and Advanced user settings.

Menu options/Search paths
All options that can be selected on the display are marked in the manual with slightly larger and grey-shaded text, e.g. Set destination.

Search paths in the menu tree are stated as, e.g.:

Set destination ➔ Address ➔ City

Special text

NOTE

Texts marked with NOTE provide advice or tips to facilitate use of e.g. features and functions.

Footnote

There is information in the manual that is added as a footnote at the bottom of the page or in direct association with a table. This information is a supplement to the text to which it refers via the footnote number.

Changes in the manual

The specifications, design features and illustrations in this owner’s manual are not binding.

We reserve the right to make modifications without prior notice.

© Volvo Car Corporation
01 Get to know your navigation system

General
The navigation system can be used without a destination being selected. The map with the position of the car is shown on the screen and the car is shown with a blue triangle.

The system is updated continuously and could therefore contain functions not described in this manual.

The system content may vary slightly from country to country and some menu options are not available to all countries for technical reasons.

Startup
The system starts by displaying a screen where you have to confirm the text content by pressing ENTER after selecting Easy (Easy mode) or Advanced (Advanced mode).

Map position
After Startup, the Main menu is displayed briefly until the screen switches to Map mode. At this point, the current map covers the entire screen.

• Press BACK to activate the Main menu, see page 28.
• Press ENTER to activate the Quick menu, see page 28.

Settings
The system is supplied with default settings, but starts with the settings last made.

If a setting has been changed and the factory setting is required again then only the current function is affected.

There is no function that resets all settings simultaneously.

On/Off
On
The system is switched on automatically when the ignition key/starter knob\(^1\) is turned to position I or II.

If the system has been switched off manually, it must also be switched on manually as follows:

1. The ignition key/starter knob must be in position I or II (see the instruction manual for the car).
2. Press ENTER or BACK.
3. The screen is activated.

The system may need a few seconds in order to detect the position and movement of the car.

Off
The system is switched off automatically when the ignition key is turned to position 0.

The system can be switched off manually so that it does not start automatically the next time the ignition key is turned to position I, as follows:

1. Press BACK to reach the Main menu.

---

\(^1\) Used instead of an ignition key in cars fitted with the Keyless system.
2. Scroll to **Shut down** with the **navigation button**.
3. Press **ENTER**.
4. The screen is powered down.

**NOTE**
The system is also available with the engine switched off. For this reason, remember that frequent use of the navigation system with the engine switched off can drain the battery.

**Simple/Advanced setting**
When the navigation system starts up the required user settings are selected.

- **Easy**
  Only the most important menus are available in this mode. Suitable for simply travelling from point A to B.

- **Advanced**
  All settings and functions are available in this mode.

**Switching between settings**
It is possible to switch between **Easy** and **Advanced** settings under **Settings**.

Settings made in **Easy** mode do not transfer over to **Advanced** mode and vice versa, but instead are stored in each respective mode.

Refer to the following page to see which menus differ between the two options.

**Demo (simulated guidance)**
Specify a destination in order to obtain an overview of how guidance works. Guidance to the specified destination can be simulated when the car is stationary.

This function is available only in mode **Advanced**.

For more information on Demo, see page 59.

01 Get to know your navigation system

Menus
01 Get to know your navigation system

Component location and functions C30
01 Get to know your navigation system

Component location and functions C30

1 Main unit
The system is hard disk based. For more information, see page 24.
The main unit is fitted in the glovebox and includes the following functions:
• Calculating the position of the car
• Calculating the route to the specified destination
• Handling traffic information
• Voice guidance
• Storing map data
• DVD player; for updating the map data and software.

NOTE
The main unit’s DVD player is designed for Volvo’s map discs.

The GPS and TMC receivers are integrated in the main unit.

Positioning
The car’s speed sensor and a gyro calculate the current position and the direction of travel of the car using signals from the GPS satellite system.
The advantage of this concept is that the navigation system registers and calculates the route outline even if the GPS signal is temporarily lost, e.g. when driving through a tunnel.

Traffic information
TMC (Traffic Message Channel) is a standardised coding system for traffic information. The receiver automatically searches for the correct frequency. Reception takes place via the FM antenna.
The coverage area of the system is under constant development which is why updates can sometimes be necessary, see page 24.
Irrespective of whether Easy or Advanced user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

2 Speakers
Navigation system audio uses the front loudspeakers.

3 Keypad
The keypad is located on the right-hand rear side of the steering wheel. Use it to scroll between different menu options, to confirm selections or to move back in menus. For more information, see page 20.

4 Screen
The screen displays maps and provides detailed information on route type, distance, menus etc. For screen care, see page 24.

5 IR receiver
The IR receiver for the remote control is located adjacent to the screen on the speaker grille. For more information, see page 20.

The IR receiver for the remote control is located in the audio system’s control panel. For more information, see page 20.
01 Get to know your navigation system

Controls

Keypad location and IR receiver

The navigation system is controlled with the steering wheel’s keypad or the remote control.

The keypad is located on the right-hand rear side of the steering wheel.

Aim the remote control towards the IR receiver located on the loudspeaker grille adjacent to the screen or in the audio system’s control panel (XC90 only).

NOTE
The remote control contains AAA or R03 batteries. Try changing to new batteries first if the remote control does not work.

Keypad, steering wheel/remote control

The steering wheel keypad and the keypad on the remote control have the same functions. Use the keypad to scroll through different menu options, confirm selections or move back in menus.

The design may vary for different models.

1 Navigation button
Scroll between different menu options using the navigation button –, the keypad’s locating pin or the remote control’s arrow keys <, >, V and V –. The navigation button also moves the cursor (hairline cross) on the map.

2 ENTER
Confirms or activates selections.

3 BACK
Undoes the most recent selection or goes back in the menu structure.

"Do not disturb"

In some situations, the system requires a few extra seconds to make a calculation. A symbol is then displayed on screen.

NOTE
When the calculation symbol appears, the system is unable to accept any commands from the navigation, ENTER or BACK buttons.
Entering and selecting options

The keyboard is used in many places within the menus for entering specific information, e.g. type of facility, country, city, street address, street or post code.

1. Select the letters using the **navigation button** and press **ENTER**.
   - When there are no further alternatives the remaining letters in the name are entered automatically.
   - The list at the bottom of the screen shows the first three possible alternatives matching the letter input.

2. It is also possible to scroll down using **V** to directly access alternative names on the list.

3. Select the alternative and press **ENTER**.

The scroll bar on the right-hand side of the list shows that there are more alternatives in the list than those shown on the screen. The number (110) indicates the number of options.

1. Return to the character chart from the list of alternatives using **BACK**.
2. Delete the input letters entered one at a time using **BACK**.

**General search**

The search function is always available and always works in the same way irrespective of menu status when a location is entered.

If **ENTER** is pressed during an input then all reply combinations are shown for each respective alternative: City, street, facility etc.

For example, if a search is made for a name such as London Airport then all London combinations will be shown when **LO** is input. The more letters you input the more specific the reply.

A search for **LO** also provides reply alternatives such as Restaurant **Lou Trivalou** for example, as alternatives containing several words separated by spaces are included in the search.
01 Get to know your navigation system

Display modes and voice messages

1. 8 km to Point on map

2. 300 m to point

3. 9.4 km to THE WEST SLOUGH

4. QUEENS DRIVE, LONDON
Different display mode appearances

The appearance of the screen image depends on geographic position and the settings made, e.g. map scale, symbols selected for display etc.

Explanations for the text, signs and symbols that may appear on the screen are available on the inside of the cover.

1 Facilities along the motorway. This function is available even if a destination has not been entered. Only shown when driving on the section of motorway in question. Press ENTER on the symbol for Facilities on the far right on the Quick menu, see page 39.

2 Detailed junction map. The left-hand section of the screen enlarges the navigation at the next junction. (Alternative navigation options are only shown for major roads.) The situation is always supplemented by a voice message.

3 Two maps can be selected as display mode. The screen shows the same map image but in two different scales. Shown following ENTER on the symbol for Map/Route outline in the Quick menu, see page 38.

4 Scroll mode, see page 28 and 40.

Voice messages

After a destination has been set, Guidance is activated and when a junction or exit is approaching the system generates a voice message stating distance and type of manoeuvre. At the same time a detailed map of the junction is displayed. The voice message is repeated closer to the junction.

Guidance with voice messages can be obtained at any moment using ENTER on the Quick menu’s symbol for Guidance, see page 28 and 38.

NOTE

In some cases, e.g. for calls on the car phone, the voice message is replaced with a ping.

Toll roads

Some areas include toll roads. When a toll booth is approaching, a voice message indicates this.

A destination must be input in order to receive the message.

Compass

The map image can show the compass in two different ways:

- With the compass direction north always facing up.
- With the direction of travel always facing up.

The red tip of the compass needle points north on the map and the white tip points south.

The grey destination arrow in the outer ring of the compass points in the direction of the selected destination.

Go to Settings ➔ Map options ➔ Map orientation to select how the map direction is to be displayed and to Compass to select how the compass is to be displayed, see page 56.
Get to know your navigation system

Main unit, updating, maintenance

Contents in main unit
All map information is pre-installed on the main unit hard disk. There is no DVD disc in the unit at delivery. A DVD disc is not used until a map data update, refer to the package’s instructions.

DVD discs with updated and additional information are issued regularly. Contact a Volvo dealer for the latest issue.

See also www.volvocars.com/navi for further information on maps etc.

If you encounter any errors or other issues with your maps, we recommend that you contact map supplier NavTeq directly: see www.navteq.com.

NOTE
The main unit’s DVD player is designed for Volvo’s map discs.

Screen care
Clean the screen with a soft, lint-free rag, lightly moistened with clean water or mild window cleaning agent.

Care of DVD discs
Handle DVD discs with care. When they are not in use they must be stored in their packaging. Avoid storing them in damp, excess heat, direct sunlight or dusty surroundings.

Updating with DVD disc

NOTE
Make sure that the car’s electricity supply is secure because an update can take up to about 2 hours.

If the DVD disc, apart from new map discs, contains new software then this part starts first.

The car can be driven while map information is being updated but the system cannot be used while the update is in progress.

1. Switch on the system.
2. Eject any DVD disc that is loaded in the unit.
3. Load the DVD update disc. If there are several discs then load them in numerical order.
4. The system now updates automatically. The information shown indicates progress achieved.
5. After the update the DVD disc with the latest update must remain in the unit. If there is more than one disc then disc no. 1 must be used. If the disc is removed from the main unit then the system ceases to function.

If the system is switched off while the update is in progress then it continues automatically next time the system is activated.

In some cases map information updates can add new functions to the system.

When the update is finished the start screen is displayed.

Interrupted update
If an update is interrupted then it can be resumed. During the subsequent start-up, select the Resume map update option in the Navigation menu.

The update then resumes, not from the start, but from where the system detects that the update was interrupted.

EASY USER MODE
02 Easy user mode

**Menus**

**General**
When the navigation system starts up the required user settings are selected **Easy**.

In **Easy** mode, only the most important menus containing the most common functions are accessible.

**Main menu**

The main menu is at the top of the menu tree and can be reached by pressing the **BACK** key several times.

It is possible to switch from **Easy** to **Advanced** user settings in the main menu under: **Settings ➔ System options ➔ User mode**.

**Quick menu**

The most common functions are collected together in the Quick menu, which makes them easier to access while driving.

1. Press **ENTER** in Map mode.
2. Select a symbol using ◄ or ►.

Most system settings can be made under **Settings** in the Main menu while others can only be accessed via the Quick menu.

**Map scale**

A menu containing two options is displayed.

Pressing **ENTER** on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km, to give you a greater perspective or allow you to see more details. Stepless changing is possible if you hold down **ENTER** - release the button when the scale is suitable.

**Guidance**

Pressing **ENTER** provides current voice guidance.

**Traffic information**

Irrespective of whether **Easy** or **Advanced** user settings are selected, traffic information transmitted is always received and presented. For more information, see page 53 or 62.

**Scroll menu**

In Scroll mode, a hairline cross is manoeuvred over the map image.

- Activate Scroll mode (Scroll menu) by scrolling with the **navigation button**.

The longer you hold down the button, the faster the hairline cross moves across the map.

**Menu**

- Press **ENTER** in Map scroll mode to view the Scroll menu.

---

1 Does not apply to all areas/countries.
Scale
Changes the size of the map image to provide a larger perspective or more detail.

Pressing ENTER on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km.

Stepless changing is possible if you hold down ENTER - release the button when the scale is suitable.

Set as destination (Set as destination)
Selects the location marked by the hairline cross as a destination by pressing ENTER. Guidance starts immediately.
### Menu options

Shown here are three of the menu tree’s levels. Several of the menus at level three have further submenus - these are described in more detail in their respective sections.

#### User mode

- Simple/Advanced

#### Shut down

- page 9
Address

1. Scroll to Country (Country) and/or City (City) and press ENTER.
2. Or choose from the latest options selected by pressing >.

(For information on how the keyboard is used, see page 21.)

NOTE
The system starts with Street in order to avoid misunderstanding when two nearby cities/localities have grown together.

Alternatives 1
- Select Street (Street) without selecting a city.

If the street appears in several cities, a list will be displayed offering you alternatives to choose from. The system guides you to the middle of the street selected.

Alternatives 2
1. Start by selecting City
2. Then select Street.

NOTE
The definition of city or area may vary from country to country and even within the same country. In some cases, it refers to a municipality and in others it refers to a district.

No street addresses have been entered in the system for small locations. It is always possible to choose the centre of the place as a destination.

Specify street number
If the selected address has a street number, this can be entered in order to specify the destination more precisely.

1. Scroll to the line for Number after entering the street address, then press ENTER.
   > Alternative street numbers are displayed.
2. Enter the required street number.
3. Scroll to Select and press ENTER.
   > The address selected appears in the itinerary.
4. The cursor appears on Start - press ENTER again.
   > Route indication starts.

Alternatively:
- Scroll to Start and press ENTER.
02 Easy user mode

Set destination

- Route indication starts immediately.
If the street number is not specified then the system guides to the middle of the selected street.

Select
Confirms input number.

Cancel
Go back to previous screen.

Enter a junction

Start guidance
- Scroll to Start guidance to start the guidance.

Search by post code

Set destination ➔ Address ➔ City

Instead of searching in a city, you can choose to search within a postcode area.

1. Select City and press ENTER.
2. Scroll to Post code and press ENTER.
3. Select digits and press ENTER, or select from the list of alternatives.
4. Scroll to Street to choose from addresses with the selected postcode, then press ENTER.

5. Scroll to Start guidance for guidance to the destination.

NOTE
This also applies when searching for facilities.

Search by facilities

Facilities is a collective name for petrol stations, hotels, restaurants, Volvo dealers, hospitals, car parks etc.

- Press ENTER to access a submenu with different search options in order to set a facility.

Country (Country)
- Enter and select country and press ENTER.

City (City)
- Enter and select city and press ENTER.

Type (Type)
- Enter and select type of facility and press ENTER.

Name (Name)
- Enter the name of a facility, or select from among the alternatives in the menu.

The list only displays the facilities in the selected city/selected area.
Select from among the last 20

Set destination ➔ Last 20

A list of the twenty most recent destinations is displayed.

- Scroll to the desired destination using ➔ or ENTER to access the submenu.

Set as destination
Adds the destination to the itinerary.

Delete location
Deletes the location from the list Last 20.

Location on map

Set destination ➔ Location on map

1. Use the navigation button to move the hairline cross to the required destination and press ENTER to access the Scroll menu, see page 28.

2. Scroll to Set as destination and press ENTER.

NOTE

It is also possible to search for a location on the map directly with the crosshair by using the navigation button in Map mode.
02 Easy user mode

Show/Delete destination

**Show destination on map**

- **Show destination**

  Press **ENTER** to obtain a map overview of the area you set as final destination.

**Delete destination**

- **Remove destination**

  1. Press **ENTER** to reach the destination to be deleted.

  2. Press **ENTER** again to delete the destination.
02 Easy user mode

**Guiding voice**
Settings ➔ Guiding voice

Set female or male guiding voice¹.

**Guiding volume**
Settings ➔ Guiding volume

Select the volume of voice messages, or switch them off completely.

**Language**
Settings ➔ Language

Set language for menus, text and voice messages.

**Colour**
Settings ➔ Colour

There are four screen display settings - select the one that suits you best.

**Map view**
Settings ➔ Map view

The map can be displayed in 2D (from directly above) or 3D (obliquely from above).

**Distance Unit**
Settings ➔ Distance Unit

Select whether distance should be shown in km or UK-mile.

**User mode**
Settings ➔ User mode

Switch between Easy and Advanced user settings.

¹ Not applicable to the Netherlands. Instead there is the choice of language between Nederlands and Belgisch.
ADVANCED USER MODE
03 Advanced user mode

Menus

**General**
When the navigation system starts up the required user settings are selected Advanced.
Access to all of the navigation system's settings and functions is available in the Advanced mode.

**Main menu**
The main menu is at the top of the menu tree and can be reached by pressing the BACK button one or more times.
It is possible to switch from Advanced to Easy user settings in the main menu under:

Settings ➔ System options ➔ User mode

**Quick menu**
The most common functions are collected together in the Quick menu, which makes them easier to access while driving.

1. Press ENTER in Map mode.
2. Select a symbol using < or >.

Most system settings can be made under Settings in the Main menu while others can only be accessed via the Quick menu.

**Fast storage of current location**
You can save the location of your car to the map at any one time at the touch of a button.
- Press ENTER - hold down the button until the display changes.
- Your location will then be stored, as indicated by this symbol. Information linked with the position is adjusted via Stored location ➔ Edit, see page 46.

**Route outline/Scale**
A menu containing four options is displayed.
Pressing ENTER on the option at the top displays a map showing the remaining route outline from the current position to the destination.
Pressing ENTER on the second option displays a map showing the entire route outline from start to destination.
Pressing ENTER on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km, to give you a greater perspective or allow you to see more details.
Stepless changing is possible if you hold down ENTER - release the button when the scale is suitable.
If you opt to display two maps, the map scale symbol appears at either end of the Quick menu so that you can adjust the relevant scale individually.

**Guidance**
Pressing ENTER provides current voice guidance.

**Map/Route outline**
Pressing ENTER displays a list of approaching waypoints. The distance between waypoints and type of manoeuvre are displayed in addition to the road name.

---

1 A route must be selected.
One map/Two maps
Pressing ENTER displays one large or two smaller map images of the current area. Different scales may be input for the respective maps.

Surveillance
Allows you to save map views of three different monitoring areas, e.g. roads with high traffic densities that are often subject to traffic problems.

Select Surveillan.1, 2 or 3. To view previously set surveillances, see page 40.

– Diversion
Displays a menu with Avoid and the options 1-5-10-20-40-80 km.

Avoid streets/roads
This function deselects streets or roads from an itinerary set up so that you do not have to drive through a known roadworks area, for example.

1. Select Avoid in the Diversion menu and press ENTER. A list of streets/roads included in the route outline is shown.
2. Scroll to the street/road to be avoided and press ENTER.
3. If several streets/roads are to be avoided, start by scrolling using V to the first street/road in the group to be avoided, then press ENTER. Then scroll to the last street/road in the group to be avoided and press ENTER.

The system then calculates, as far as possible, a new route outline which leads back to the original route outline only once the specified stretches have been avoided and passed.

Avoid stretch within 1-80 km
This function deselects an entire area in the original itinerary so that you do not have to drive through a densely populated area in rush hour, for example.

– Select an option from the diversion menu 1-80 km and press ENTER.

The system then calculates, as far as possible, a new route outline which leads back to the original route outline only once the specified area has been avoided and passed.

It is also possible to avoid an area by marking a square area directly on the map, see Avoid specified areas under

Settings ➔ Route options

– Traffic information
Displays a menu containing different options for viewing information on traffic problems within the area displayed on screen.

A change in the scale affects the number of messages shown, see page 66.

Read message
Pressing ENTER allows you to scroll through the traffic messages displayed on screen.

Show all
Pressing ENTER displays all messages.

Hide all
Pressing ENTER hides all messages.

Show selected
Pressing ENTER allows you to select the type of traffic messages to be displayed in the map.

Irrespective of whether Easy or Advanced user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

– Facilities
Displays a menu containing various options for searching for a facility.

2 Only in areas that can receive traffic information.
3 Does not apply to all areas/countries.
Around the car
Pressing ENTER allows you to search around the car. See page 45

Along the route
Pressing ENTER allows you to search along the route. See page 45

Along the motorway
Pressing ENTER allows you to search for rest areas, petrol stations and restaurants that are readily accessible along the motorway.

If a calculated route extends over several motorways then the system only searches along the section of motorway currently being used.

Scroll menu
Map scroll
In Scroll mode, a hairline cross is manoeuvred over the map image.

- Activate Scroll mode (Scroll menu) by scrolling with the navigation button.

The longer you hold down the button, the faster the hairline cross moves across the map.

Menu

- Press ENTER in Map scroll mode to view the Scroll menu.

Scale
Changes the size of the map image to provide a larger perspective or more detail.

- Pressing ENTER on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km.
- Stepless changing is possible if you hold down ENTER - release the button when the scale is suitable.

Set as destination (Set as destination)
Selects the location marked by the hairline cross as the destination.

- Press ENTER. Guidance starts immediately.

Facilities around (Facilities around)
A menu is displayed.

- Choose between the Last 5 and All types to search for facilities within the local area.

Read traffic msg. (Read traffic msg.)
Searches for current traffic messages within the area.

Surveillance (Set for surveill.)
Pressing ENTER displays a menu containing various options.

- Select between Surveillance 1, 2 or 3 and press ENTER to store a map view you want to save as a surveillance area, e.g. heavily trafficked roads that are often subject to traffic problems.

Activating the map
Selects map options in the Quick menu.

- Select required surveillance.

Store location (Store location)
Saves a selected location, which then appears under:

Set destination ➔ Stored locations

---

3 Does not apply to all areas/countries.
Follow route in itinerary
To be able to easily follow a set route in the itinerary, there is a built-in "magnet function" where - regardless of how the route outline turns and changes compass direction - the hairline cross follows the route outline automatically by simply holding down a button.

One of the lines on the hairline cross indicates which button is to be selected - it appears "fatter" than the other one.

The route outline is followed automatically using button ▲ or ▼.

If no "magnet function" is required, the "fat" hairline cross line disappears when you scroll the hairline cross a few millimetres off the selected itinerary. The scroll function then returns to normal.
## Menu options

Shown here are three of the menu tree’s levels. Several of the menus at level three have further submenus - these are described in more detail in their respective sections.

### Start demo

### Shut down
**Set destination**

**Address**

1. Scroll to **Country** (Country) and/or **City** (City) and press **ENTER**.
2. Or choose from the latest options selected by pressing >.

(For information on how the keyboard is used, see page 21.)

**NOTE**

The system starts with Street in order to avoid misunderstanding when two nearby cities/localities have grown together.

Alternatives 1

- Select Street (Street) without selecting a city.

If the street appears in several cities, a list will be displayed offering you alternatives to choose from. The system guides you to the middle of the street selected.

Alternatives 2

1. Start by selecting City.
2. Then select Street.

**NOTE**

The definition of city or area may vary from country to country and even within the same country. In some cases, it refers to a municipality and in others it refers to a district.

No street addresses have been entered in the system for small locations. It is always possible to choose the centre of the place as a destination.

**Specify street number**

If the selected address has a street number, this can be entered in order to specify the destination more precisely.

- Scroll to the line for **Number** after entering the street address, then press **ENTER**.

If the street number is not specified then the system guides to the middle of the selected street.

Alternatively:

1. Enter the required street number.
   > Alternative street numbers are displayed.
2. Scroll to **Select** and press **ENTER**.

**Cancel**

Go back to previous screen.

**Enter street address**

The system places the cursor on Street (Street) first. The last Country (Country) selected is preselected.

If not:
**Enter a junction**
- Scroll to **Intersection (Junction)** and select a street which intersects the street selected.

**Start guidance**
1. Scroll to **Start guidance** to start the guidance.
2. Scroll to **Select** to add the input address to the itinerary.

**Information**
Provides information about the destination.

**Search by post code**

1. Select **City** and press ENTER.
2. Scroll to **Post code** and press ENTER.
3. Select digits and press ENTER, or select from the list of alternatives.
4. Scroll to **Street** to choose from addresses with the selected postcode, then press ENTER.
5. Scroll to **Start guidance** for guidance to the destination.

**NOTE**
This also applies when searching for facilities.

**Search by facilities**

- Enter the name of a facility, or choose from the alternatives in the menu.

The list only displays the facilities in the selected city/area.

**Around the car (Around the car)**
Search Last 5 or All types.

The system searches for facilities around the car (max. 100 km radius). The search is stopped after 40 facilities have been found.

**Along the route (Along the route)**
Search Last 5 or All types.

**Set destination**
Facilities is a collective name for petrol stations, hotels, restaurants, Volvo dealers, hospitals, car parks etc.
- Press ENTER to access a submenu with various search options for specifying facilities.
03 Advanced user mode

Set destination

When a destination has been specified, the system can search for facilities in an area along the route (within 1 km of the route).

Around point on map (Around point on map)
The system searches in the same way as Around the car, but around a chosen point on the map.
1. Move the crosshairs on the map using the navigation button.
2. Press **ENTER** to access the Scroll menu.

Along a street (Along a street)
The system searches along a specified street.

1. Scroll to **Country** and/or **City** and press **ENTER**.
   Or choose from the latest options selected by pressing >>.
2. Scroll to **Name** and press **ENTER** to enter a facility name without specifying a city.
3. Scroll to **Select** and press **ENTER**.
4. Then scroll to **Start guidance** and press **ENTER** for guidance to the destination.

**NOTE**
To refine the search, select City first and then scroll to Name.
There are sub-categories for e.g. restaurants to simplify searching.

Information on facility
Information shows the address, coordinates and - in some cases - telephone number of the facility. If the car is equipped with built-in phone then the function Call is also activated.

Call
The telephone dials the number specified.

Map
Displays the location of the facility on the map.

Other facilities
Airports, for example, often have restaurants, petrol stations, etc. directly next to the airport.
Instead of searching on Restaurants in the main menu, you can select Restaurants directly for the Airport selected.
Avoiding alternatives off-airport simplifies your search and makes it faster.

Stored locations
Stored location is a destination saved previously, e.g. home address, favourite restaurant, airport, Volvo dealer. Information on how to store a location, see page 50.

1. Scroll between the stored locations and press >> or **ENTER** to access the sub-menu.

Add to itinerary
Adds the stored location to the itinerary.

Information
Provides information about the stored location.

Edit
Change name, add sound, etc. for a stored location. See under the following heading, Add information on stored location.

Facility types/Different categories
The system places the cursor on Type first.
The last Country selected is preselected.

If not:

1. Move the crosshairs on the map using the navigation button.
2. Press **ENTER** to access the Scroll menu.

3. Scroll to **Country** and/or **City** and press **ENTER**.
   Or choose from the latest options selected by pressing >>.
4. Then scroll to **Name** and press **ENTER** to enter a facility name without specifying a city.
5. Scroll to **Select** and press **ENTER**.
6. Then scroll to **Start guidance** and press **ENTER** for guidance to the destination.

**NOTE**
To refine the search, select City first and then scroll to Name.
There are sub-categories for e.g. restaurants to simplify searching.

Information on facility
Information shows the address, coordinates and - in some cases - telephone number of the facility. If the car is equipped with built-in phone then the function Call is also activated.

Call
The telephone dials the number specified.

Map
Displays the location of the facility on the map.

Other facilities
Airports, for example, often have restaurants, petrol stations, etc. directly next to the airport.
Instead of searching on Restaurants in the main menu, you can select Restaurants directly for the Airport selected.
Avoiding alternatives off-airport simplifies your search and makes it faster.

Stored locations
Stored location is a destination saved previously, e.g. home address, favourite restaurant, airport, Volvo dealer. Information on how to store a location, see page 50.

1. Scroll between the stored locations and press >> or **ENTER** to access the sub-menu.

Add to itinerary
Adds the stored location to the itinerary.

Information
Provides information about the stored location.

Edit
Change name, add sound, etc. for a stored location. See under the following heading, Add information on stored location.
Sorting
Sort stored locations according to icon or name.

Delete location
Deletes a stored location.

Delete all
Deletes all stored locations.

Move the position of a stored location
1. Select Edit, scroll with ➤ to Adjust and press ENTER in order to specify a new position on the map for the stored location.
2. Move the crosshairs to the new position using the navigation button, then press ENTER.
3. Then select Store location and press ENTER to save the location.

Add information on stored location
- Select Edit, scroll with ➤ to Add info. and press ENTER to add further information on the stored location.

Choose from the last 20

Set destination ➔ Last 20

A list of the twenty most recent destinations is displayed.
- Scroll to the desired destination using ➤ or ENTER to access the submenu.

Add to itinerary
Adds the destination to the itinerary.

Information
Provides information about the destination.

Delete location
Deletes the location from the list Last 20.

Delete all
Deletes all addresses from the list Last 20.

Return trip

Set destination ➔ Return trip

- Select Start guidance and press ENTER.
The system then starts guidance back to the location where Start guidance was last selected.

Search via point on map

Set destination ➔ Location on map

1. Use the navigation button to move the crosshairs to the required destination, then press ENTER to access the Scroll menu.
2. Select Set as destination, see page 40.

NOTE
It is also possible to search for a location on the map directly with the crosshair by using the navigation button in Map mode.
Set destination

Search via latitude/longitude

1. Select a destination by entering the coordinates for the destination.
2. Enter a latitude using the navigation button: select N for north or S for south.

NOTE

London is at longitude 0 (zero). Points west of London’s longitude are indicated by W (West) and points east of it are indicated by E (East).

3. Scroll to the next line and specify longitude: select E for easterly or W for westerly.

Press OK

> Shows the location of the specified coordinates on the map.

4. Press ENTER to reach the Scroll menu.

5. Scroll to Set as destination and press ENTER to select the location as a destination.

6. Press BACK to return to coordinate input.

Cancel

Return to previous screen.
Create an itinerary

Destination/intermediate destination
The menu option Itinerary (Itinerary) can be accessed only when you have input an itinerary.
Create an itinerary with several waypoints to avoid entering destination after destination during your trip. One final destination with up to six waypoints can be specified in an itinerary.

Start guidance (Start guidance)

Starts guidance to the destination.
Add to itinerary (Add to itinerary)
Additional waypoints are added to the itinerary here, see page 44.
Route options (Route options)
Route prioritising options, see page 54.
Clear itinerary (Clear itinerary)
Deletes the whole itinerary.

Itinerary layout

Information (Information)
Provides information about the destination.
Delete (Delete)
Deletes the destination from the itinerary.
Move (Move)
Changes the location of the destination in the itinerary.
Adjust (Adjust)
Changes the location of the destination on the map.
Store (Store)
Saves the destination that will be available under Stored locations.
03 Advanced user mode

**Itinerary**

**Delete from itinerary**

- Itinerary

Delete the whole itinerary
All waypoints and the final destination are deleted.
- Scroll directly to Clear itinerary and press ENTER.

Delete intermediate destination in the itinerary
1. Select one of the input intermediate destinations and press ENTER or ⏯️ to access the submenu.
2. Scroll to Delete and press ENTER.

**NOTE**
Passed waypoints are automatically deleted from the itinerary.

**Store for re-use**

Up to 250 destinations can be stored for re-use in different itineraries.

An acoustic signal that alerts the driver to the fact that the stored location is approaching, plus other information can be linked to the stored location, see page 47 - Add information on stored location.

**Save a location from the itinerary**

1. Use the navigation button to step through to the destination you want to store, then press ENTER or ⏯️ to access the submenu.
2. Select Store and press ENTER.
3. Use the navigation button to select a symbol to be displayed on the map, then press ENTER.
4. Enter the required name.
5. Scroll to Store and press ENTER.

**Save a location on the map**

1. In Scroll mode, use the navigation button to step through to the point to be stored, then press ENTER.
2. Select Store location from the Scroll menu, then press ENTER.
3. Use the navigation button to select a symbol to be displayed on the map, then press ENTER.
4. Enter the required name.
5. Scroll to Store and press ENTER.

A current location can also be stored quickly while driving, for example, at the touch of a button, see page 38 - Fast storage of current location.
**Next destination in itinerary**

1. Press **ENTER** or ➔ to view information on the destination such as the name, time to destination or distance from current position to destination.

2. Press **ENTER** if several destinations are presented in order to view information and see them on the map.

3. Step through to Map and press **ENTER** to view the map of the area.

The map image shows the next destination.
The map image shows the car’s position.

- Press ENTER or ⏳ to obtain information on the location, such as name and coordinates for example.

GPS
Specifies the number of satellites the system is in contact with.
Irrespective of whether Easy or Advanced user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

**NOTE**

Traffic information is not available in all areas/countries.
**Route options**

Select a fast, short or simple route when calculating a route.

- **Fast**: As far as possible the system prioritises major roads with high speed limits.
- **Short**: As far as possible the system prioritises the nearest road.
- **Easy**: As far as possible the system prioritises roads that do not involve complicated manoeuvres and junctions.

**NOTE**

When calculating a route, the system as far as possible takes consideration of the alternatives the driver has chosen to avoid. However, an exception is made if no reasonable alternative is available.

**Avoid motorways**
Indicate whether motorways are to be avoided when calculating a route.

**Avoid toll roads**
Indicate whether toll roads are to be avoided when calculating a route.

**Avoid ferries**
Indicate whether car ferries are to be avoided when calculating a route.

**Avoid car train**
Indicate whether car trains are to be avoided when calculating a route.

**Avoid traffic problems**
Indicate whether the system should give consideration to traffic problems when calculating a route.

**Avoid time-restr. roads**
- Select **Yes** if you want the system to completely avoid time-restricted roads when calculating a route.
- Select **No** if the system is to give consideration to time-restricted roads when calculating a route.

The system uses the time in the car’s clock to determine whether a road should be avoided.

**NOTE**

If a time zone boundary is crossed then the car’s clock must be adjusted.

**Avoid specified areas**
The function is for avoiding being guided through special areas, cities or districts. The system ignores the selected areas when calculating the route outline. The exception is motorways which are used for calculating even in an area selected to be avoided.
In the same way, the marker field mode can be changed under Adjust area (Adjust area).

3. Select Set area to avoid and press ENTER.
   > The selected area is saved to a list in which a number of areas can be stored and activated when required.

4. Agree to avoidance of the area with ENTER on OK and a cross in the list.
   > The system will then, as far as possible, avoid this area in the itinerary.

The areas stored in the list can be adjusted in terms of size and geographical location under Edit, and they can be deleted permanently from the list with Delete. A number of activated areas can be deactivated simultaneously using the None option.

Reset to default
Restore factory settings for Route options.
– Press >, select OK and press ENTER.

Settings → Map options

Select here what facilities are to be displayed in the map and how the map is to appear on screen.

1. Select a function to be adjusted using the navigation button.

2. Press ENTER to open the function.

Facility selection
Press > to access the submenu's options.

- Show all: All facilities symbols are shown on the map image.
- Hide all: No symbols are shown.
- Show selected: Press > to view all symbols which can be shown on the map image. Then select symbols as follows:
03 Advanced user mode

**Settings**

1. Scroll through the symbols by pressing ▲ or ▼.

2. Activate the required symbols with a cross with ◀ or ▶.

3. Press ENTER to save.

**Map**

Choose between the options Show and Hide. If the map is hidden, the system guides with an arrow.

**Right map view**

Select whether the map is to be displayed in 2D (from directly above) or 3D (obliquely from above).

- With the 3D option, the heading is always upwards on the screen.
- With the 2D Heading option, 2D is shown with the heading upwards on the screen and the 2D North option provides 2D with compass direction North always upwards.

**Left map view**

See the description in the previous section.

**Selection of elevation angle.**

After the selection of 3D with ▶ or ◀ and ENTER the control for the elevation angle is displayed. Select the desired angle with ▲ or ▼ followed by ENTER and BACK.

**Compass**

Choose whether the compass is to be displayed on the screen.

**Current location**

Indicate whether the name of the street/road on which the car is currently driving should be shown at the bottom of the screen.

**Reset to default**

Restore factory settings for Map options.

- Press ▶, select OK and press ENTER.

**Guiding options**

**Time/dist. to go**

Select one of the alternatives RTA/ETA/Hide.

- RTA (Remaining Time to Arrival): Remaining time to arrival.
- ETA (Estimated Time of Arrival): Estimated time of arrival.

**NOTE**

The time set on the car’s clock controls the time indicated for ETA.
Charge zone warning
Besides road tolls with barriers or other blocking systems, there are also charge routes/zones without physical barriers, such as congestion charge areas.
Select YesOn if you require warnings of these types of road, otherwise select NoOff.

Facility warning
Safety camera.
The driver is alerted by means of an acoustic signal and a symbol that a safety camera is approaching. The symbol is orange if vehicle speed exceeds the permitted limit - otherwise it is white.
- Select Yes to hear an acoustic warning signal, or No if no signal is required.

NOTE
The type of information permissible for inclusion on the map is stipulated in national legislation. For current information, see www.volvocars.com/ivi.

NOTE
- In certain regions the maximum permissible speed is not stated on the map in combination with a camera warning.
- Pay attention that the posted maximum permissible speed may sometimes be changed and accordingly deviate from the navigator’s database.
- The driver always has the responsibility that the traffic and speed regulations in force are followed.

Reset to default
Restore factory settings for Guiding options.
- Press », select OK and press ENTER.

System options
Settings ➔ System options
1. Scroll between the functions using the navigation button, then press ENTER to save the settings.
2. Press BACK to cancel.

Guiding voice
Select the guiding voice you want as the setting: Female/Male.1

Guiding volume
Set the volume for voice messages.

Language
Sets language for menus, text and voice messages.

Menu colour
Select Black, Chrome or Blue for the appearance of the menus.

Map colour
Select Bright 1, Bright 2 or Dark.
The light colours are intended for daylight and dark for night or in darkness.

Screen saver
Indicate whether the screen saver should be used (the screen goes out 30 seconds after the last keystroke).

---
1 Not applicable to the Netherlands. Instead there is the choice of language between Nederlands and Belgisch.
Help
Indicate whether help texts should be displayed at bottom of the screen.

Distance Unit
Select the unit to be displayed for distance - km or statute mile.

User settings
Switch between Easy and Advanced mode.

Date & time info
Select how the date and time are to be displayed.

GPS information

The car's position and height above sea level (Altitude).

Press ➤ to see coordinates and height above sea level for the car’s position, as well as the number of satellites the system is in contact with.

NOTE
Information on height is displayed in increments of 10 m. All heights below 50 m ASL are displayed as <50 m.

About
Shows system and map information.

Reset to default
Restore factory settings for System options.

Press ➤, select OK and press ENTER.
Start demo (simulation)

Settings ➔ Start demo

Demo demonstrates the system when the car is stationary by simulating a journey to a specified destination.

It is also possible to make settings during the demonstration.

Stop demo stops the simulation.

NOTE
A destination must be entered in order for the demo to work.
04 Traffic information

General

Display and reception
Traffic information that is transmitted is always received and presented, irrespective of whether Easy or Advanced user settings are selected.

The settings for how traffic information should be presented can only be changed in Advanced mode, see page 38.

The presentation of traffic information also depends on how it is transmitted.

NOTE
Traffic information is not available in all areas/countries.
The traffic information transmission areas are constantly being expanded.

Traffic symbols on the map
A symbol is shown in the upper left-hand corner of the map when there is at least one traffic message along the itinerary’s route. The traffic problem can be scrolled forward using the navigation button in order to see its position and nature.

Traffic problems are marked with symbols, lines and frames. These are coloured red or yellow.

Red - Important information.

Yellow - General information.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>⭐⭐</td>
<td>Accident</td>
</tr>
<tr>
<td>⬅️⬆️</td>
<td>Slow traffic</td>
</tr>
<tr>
<td>⬅️⬇️</td>
<td>Slow traffic in both directions</td>
</tr>
<tr>
<td>🚗</td>
<td>Stationary traffic</td>
</tr>
<tr>
<td>⏳</td>

<td>Other information</td>
</tr>
</tbody>
</table>

Extent

Certain traffic messages also contain information on the extent of the traffic obstruction.

On all scales up to 5 km the extent is marked with a red or yellow line along the route affected. The length of the line is corresponds to the extent (distance) of the traffic problem.
**Before guidance is started**

Settings ➔ Route options

In connection with entering a new itinerary in the navigator: Select whether or not the system should take into consideration traffic problems when the Start guidance function is activated, see page 49.

1. Set Avoid traffic problems.
2. Choose between Yes and No.

**Yes**
The system attempts as far as possible to avoid roads with traffic problems when the itinerary is activated.

**No**
The system does not avoid any roads with traffic problems when the itinerary is activated.

**NOTE**

When starting up the system it can take up to 15 minutes before all traffic information for the area has been loaded.

**During the journey**

Settings ➔ Traffic information ➔ Dynamic route guidance

The system proposes another route if there is a suitable alternative, e.g. if a traffic message states that there is a traffic problem on the original itinerary.

**Man/Sem-aut/Auto/Off**

Choose how the system is to display an alternative route by selecting **Male/Sem-aut/Auto**, or shut down the function by selecting **Off**.

- **Manual**
  Another route is suggested, regardless of whether it is better or worse - select/accept the suggested route, then a new itinerary will be used.

- **Semi-auto**
  Another route is suggested, but only if it is better - select/accept the suggested route, then a new itinerary will be used.

- **Auto**
  The system calculates and uses a new itinerary automatically if a better route exists.

- **Off**
  The system does not display or calculate alternatives for better routes.

**Messages along the route**

One of the **Male Sem-aut** alternatives is selected in the preceding section and a traffic problem arises along the route:

If there is another route past the problem, the display shows the difference in distance and driving time:

**Changed traffic situation, New route?:**
600 m longer, 00h 09m faster

(Changed traffic situation. Use new route?: 600m longer, 00h 09m faster).

- **Select Yes or No.**
- **Yes (Yes)**
  A new route is used - around and past the problem.
Avoiding traffic problems

No (No)
Guides up to and through the problem.

Show new route (Show new route)
Shows map with the new route highlighted.
Traffic-info. selection

Select the type of traffic information the system should display and to be considered in the event of calculating a route.

Settings ➔ Traffic information ➔ Traffic info. selection

Show all
All traffic information is available.

Hide all
No traffic information is displayed.

Show selected
1. Press ➔ to enable selection from symbols.

2. Select using ▲ or ▼ the traffic information symbols (traffic messages) the system should show on the map.

3. Activate and deactivate respectively using ➔ or ◄.

4. Confirm the settings with ENTER.

Traffic signs on the map

- Accident
- Contraflow
- Diversion
- Information
- Narrow road
- Parking
- Congestion
- Roadwork

Slippery road
Other hazard
04 Traffic information

Reading information

Read traffic message

A traffic message is indicated by a symbol on screen. To read a traffic message:

1. Press ENTER to call up the Quick menu:

   ![Quick menu]

2. Scroll to using or , then press ENTER, see page 38 and 39.
   
   > Current messages are marked with a red or yellow frame.

3. Browse forward or back using or and press ENTER for detailed traffic information (the illustration shows an example).

4. Press BACK to enable browsing between current messages again.

The traffic messages relevant to the map area are indicated on the screen.

Detailed information on the traffic problem is also shown. The extent of the problem is shown at the top. If the traffic problem is located along the selected route then the distance to it is specified.

If details are available, the following are also displayed:

- duration
- restrictions on speed, vehicle width and height
- roads affected.

Scale

The scale of the map determines how great a quantity of traffic information can be shown - the larger the map area shown on the screen, the more information is provided. For more information, see page 28.
Search/select station for traffic information

Settings ➔ Traffic information ➔ Search station

The system automatically searches stations for traffic information, but a specific station can also be selected.

Search stations
- Press ENTER to search for existing stations.

Select station
1. Press ENTER to select from among existing stations.
2. Select station using A or V and press ENTER.
3. Press BACK to return to the previous screen.

Current station
Shows the current station for traffic information.

Reset to default
Restore factory settings for station settings.
- Press >>, select OK and press ENTER.
Landmarks and road numbers................................................................ 70
Symbols for facilities........................................................................... 71
SYMBOLS ON THE MAP
05 Symbols on the map

Landmarks and road numbers

Landmarks
Many countries/cities have well known landmarks that can be used as target points.
When the map scale is set to 1 km or lower then a selection of landmarks is shown e.g. churches and castles.

NOTE
Landmarks are only available for Europe.

Road numbers
Local road numbers and international numbers are shown on the map.

Mountain peaks
Mountain peaks shown on the map scale are set at 5 km or lower (only applies to particular areas).

Facilities
Facilities ➔ Map options ➔ Facility selection
Select facilities to be shown on map.
Select whether all or no facilities should appear on the map or specify which should be shown.

1. With Facility selection (Facility selection) selected, press → – a menu opens.
2. Select Show selected (Show selected) and press → - a new menu opens.
3. Facilities marked with a cross are displayed on the map - scroll through the list and uncheck the → the symbols not to be displayed.
4. Finish with ENTER when all selections have been made - exit the menus with BACK.

**NOTE**

The symbol for a facility may vary between different countries.

The following symbols for the different facilities can be chosen to appear on the display screen.

Frequently asked questions

The position of the car on the map is wrong
The GPS system shows the position of the car with an accuracy of about 20 metres.

There is a greater chance of error when driving on roads lying parallel to another road, on winding roads, on roads on several levels and after driving a long distance without making any distinctive turns.

High mountains, buildings, tunnels, viaducts, over/underpasses etc. also have a negative affect on the reception of GPS signals, which means that accuracy in calculating the position of the car may decrease.

The system does not always calculate the fastest/shortest route
When calculating a route, distance, width of road, type of road, number of right or left turns, roundabouts etc. are all taken into account in order to produce the best theoretical route. A more efficient selection of route may be possible based on experience and knowledge of the area.

The system uses toll roads, motorways and ferries even though I chose to avoid them
For technical reasons, the system can only use larger roads when calculating a route extending over a long distance.

If No is selected for toll roads and motorways, then they are avoided to the greatest possible extent and are only used if there is no other reasonable alternative available.

The position of the car on the map is incorrect after transportation
If the car is transported, for example by ferry or train, or in such a way as to impede the reception of GPS signals, it can take up to 5 minutes before the position of the car is correctly calculated.

The position of the car on the map is incorrect after the car battery has been disconnected
If power has been cut from the GPS antenna, it can take more than 5 minutes for the GPS signals to be received correctly and the position of the car to be calculated.

The car symbol on screen behaves erratically after a tyre change
In addition to the GPS receiver, the car’s speed sensor and a gyro assist in calculating the current position and direction of travel of the car. After fitting the spare wheel or changing from summer to winter tyres the system needs to "learn" the size of the new wheels.

To achieve the optimum functionality of the system it may therefore be necessary to drive a number of kilometres including several significant turns.

The map image does not correspond with the real situation
Factors such as the constant expansion and rebuilding of the road network, new traffic regulations constantly being introduced etc. mean that the digital map database is not always complete. The information stored in the maps is constantly being developed and updated. Your Volvo Dealer can provide further information.

See also www.volvocars.com/navi for further information on maps etc.

The scale of the map sometimes changes
There is no detailed map information in certain areas. The system then automatically changes the degree of magnification.

The expected menu option is missing
Check the settings that have been made. Select Return to basic settings for the function in order to restore the original settings.

The system shows the route I am already on
The system cannot find a good alternative to the current route when I selected Calculate new or Diversion.
**The car symbol on screen jumps forwards or spins**
The system may need a few seconds to sense the position and movement of the car before driving off. Switch off both the system and the engine. Start again, but remain stationary for a while before starting to drive.

**I'm going to make a long journey but do not want to specify a special destination to the cities I am thinking of travelling through. How do I most easily create an itinerary?**
Specify the destination directly on the map using the hairline cross. The system automatically guides you to the final destination even though you are driving beside the intermediate destinations.

**Why do I not always receive traffic messages?**
The function is not accessible, fully developed or not available in all markets. Check also that the correct settings are made under Route options.

**My map information is not up-to-date**
Contact your Volvo Dealer regarding the updating of map data.

Notice to the user

PLEASE READ THIS END USER LICENSE AGREEMENT CAREFULLY BEFORE USING THE NAVTEQ DATABASE.

THIS IS A LICENSE AGREEMENT - AND NOT AN AGREEMENT FOR SALE - BETWEEN YOU AND NAVTEQ EUROPE B.V. FOR YOUR COPY OF THE NAVTEQ NAVIGABLE MAP DATABASE, INCLUDING ASSOCIATED COMPUTER SOFTWARE, MEDIA AND EXPLANATORY PRINTED DOCUMENTATION PUBLISHED BY NAVTEQ (JOINTLY "THE DATABASE"). BY USING THE DATABASE, YOU ACCEPT AND AGREE TO ALL TERMS AND CONDITIONS OF THIS END USER LICENSE AGREEMENT ("AGREEMENT"). IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE DATABASE, ALONG WITH ALL OTHER ACCOMPANYING ITEMS, TO YOUR SUPPLIER FOR A REFUND.

Ownership

The Database and the copyrights and intellectual property or neighbouring rights therein are owned by NAVTEQ or its licensors. Ownership of the media on which the Database is contained is retained by NAVTEQ and/or your supplier until after you have paid in full any amounts due to NAVTEQ and/or your supplier pursuant to this Agreement or similar agreement(s) under which goods are provided to you.

License Grant

NAVTEQ grants you a non-exclusive license to use the Database for your personal use or, if applicable, for use in your business’ internal operations. This license does not include the right to grant sub-licenses.

Limitations on Use

The Database is restricted for use in the specific system for which it was created. Except to the extent explicitly permitted by mandatory laws (e.g. national laws based on the European Software Directive (91/250) and the Database Directive (96/9)), you may not extract or reutilise substantial parts of the contents of the Database nor reproduce, copy, modify, adapt, translate, disassemble, decompile, reverse engineer any portion of the Database. If you wish to obtain interoperability information as meant in (the national laws based on) the European Software Directive, you shall grant NAVTEQ reasonable opportunity to provide said information on reasonable terms, including costs, to be determined by NAVTEQ.

Transfer of License

You may not transfer the Database to third parties, except when installed in the system for which it was created or when you do not retain any copy of the Database, and provided that the transferee agrees to all terms and conditions of this Agreement and confirms this in writing to NAVTEQ. Multi-disc sets may only be transferred or sold as a complete set as provided by NAVTEQ and not as subset thereof.

Limited Warranty

NAVTEQ warrants that, subject to the warnings set out below, for a period of 12 months after acquisition of your copy of the Database, it will perform substantially in accordance with NAVTEQ’s Criteria for Accuracy and Completeness existing on the date you acquired the Database; these criteria are available from NAVTEQ at your request. If the Database does not perform in accordance with this limited warranty, NAVTEQ will use reasonable efforts to repair or replace your non-conforming copy of the Database. If these efforts do not lead to performance of the Database in accordance with the warranties set out herein, you will have the option to either receive a reasonable refund of the price you paid for the Database or to rescind this Agreement. This shall be NAVTEQ’s entire liability and your sole remedy against NAVTEQ. Except as expressly provided in this section, NAVTEQ does not warrant nor make any representations regarding the use of results of the use of the Database in terms of its correctness, accuracy, reliability, or otherwise. NAVTEQ does not warrant that the Database is or will be error free. No oral or written information or advice provided by NAVTEQ, your supplier or any other person shall...
create a warranty or in any way increase the scope of the limited warranty described above. The limited warranty set forth in this Agreement does not affect or prejudice any statutory legal rights that you may have under the legal warranty against hidden defects.

If you did not acquire the Database from NAVTEQ directly, you may have statutory rights against the person from whom you have acquired the Database in addition to the rights granted by NAVTEQ hereunder according to the law of your jurisdiction. The above warranty of NAVTEQ shall not affect such statutory rights and you may assert such rights in addition to the warranty rights granted herein.

LIMITATION OF LIABILITY
The price of the Database does not include any consideration for assumption of risk of consequential, indirect or unlimited direct damages which may arise in connection with your use of the Database. Accordingly, in no event shall NAVTEQ be liable for any consequential or indirect damages, including without limitation, loss of revenue, data, or use, incurred by you or any third party arising out of your use of the Database, whether in an action in contract or tort or based on a warranty, even if NAVTEQ has been advised of the possibility of such damages. In any event NAVTEQ’s liability for direct damages is limited to the price of your copy of the Database.

THE LIMITED WARRANTY AND LIMITATION OF LIABILITY, SET FORTH IN THIS AGREEMENT, DO NOT AFFECT OR PREJUDICE YOUR STATUTORY RIGHTS WHERE YOU HAVE ACQUIRED THE DATABASE OTHERWISE THAN IN THE COURSE OF A BUSINESS.

WARNINGS
The database may include incorrect or incomplete information due to changes over time, changes of circumstances, the quality of the sources used and the process used for collection of extensive geographical data. All of these situations may lead to erroneous results. The Database does not include or reflect information on - inter alia - neighbourhood safety; law enforcement; emergency assistance; construction work; road or lane closures; vehicle or speed restrictions; road slope or grade; bridge height, weight or other limits; road or traffic conditions; special events; traffic congestion; or travel time.

GOVERNING LAW
This Agreement shall be governed by the laws of the jurisdiction, in which you reside at the date of acquisition of the Database. Should you at that moment reside outside the European Union or Switzerland, the law of the jurisdiction within the European Union or Switzerland where you acquired the Database shall apply. In all other cases, or if the jurisdiction where you acquired the Database cannot be defined, the laws of the Netherlands shall apply. The courts competent at your place of residence at the time you acquired the Database shall have jurisdiction over any dispute arising out of, or relating to this Agreement, without prejudice to NAVTEQ’s right to bring claims at your then current place of residence.
