

REMOTE CONTROL KEY WITH PCC* – PERSONAL CAR COMMUNICATOR

PCC*

- 1 Green light: The car is locked.
- 2 Yellow light: The car is unlocked.
- 3 Red light: The alarm has been triggered.
- 4 Flashing alternating red light: Alarm triggered less than 5 minutes ago.

- Locks doors and tailgate and arms the alarm*.
- Unlocks the doors^A and tailgate and disarms the alarm.
- Unlocks the tailgate – pressing twice opens the tailgate by a few cm.
- Approach light duration. Switches on the lamps in the side mirrors*, the direction indicators and parking lamps, at the number plate, passenger compartment and floor.
- Panic function. Held down for approx. 3 seconds in an emergency to trigger the alarm.
- Information on the car can be obtained within a radius of 100 metres.
 - Press the button and wait 7 seconds.
 - Pressing the button out of range shows the last status stored in the memory.

^A Automatic relocking takes place if a door/tailgate has not been opened within 2 minutes after unlocking.

START THE ENGINE

– Insert the remote control key in the ignition switch and push in the key to its end position.

– Depress the clutch or brake pedal.

– Briefly press the button to start the engine.

COLD START

NB

After a cold start the idling speed is high irrespective of outside temperature. A period of raised idling speed is part of Volvo's efficient emissions system.

During cold starts diesel engines have a certain delay in starting because the combustion chambers have to be preheated.

SWITCH OFF THE ENGINE AND REMOVE THE REMOTE CONTROL KEY

1. Briefly press the button – the engine stops.
2. Pull the remote control key out from the ignition switch.

BLIS – BLIND SPOT INFORMATION SYSTEM*

If the BLIS' indication lamp illuminates despite no vehicle being in the blind spot, the cause could be reflection from wet road surface or low sun shining into the camera for example. In the event of a direct fault in the system the display shows the text **Blind spot syst. Service required.**

KEY POSITIONS

In order to reach the following key positions without the engine starting: Do **not** depress the brake/clutch pedal.

Position Active functions

- Remote control key not inserted – Audio system and passenger compartment lighting.
- 0 Remote control key inserted - Instrument/clock lighting, steering lock off.
- 1 Inserted key and short press on **START** – sunroof*, power windows, fan, ECC, windscreen wipers, 12 V socket, RTI*.

To exit key position 0/1 and switch off all power consumers: Pull the key from the ignition switch.

KEYLESS* KEY SYSTEM

The key can remain in a pocket, for example, the whole time.

LOCK & ARM THE CAR ALARM

- Touch the rear section of one of the outer door handles (see illustration) or press lightly on the smaller of the boot lid's two rubberised buttons.

UNLOCK & DISARM THE ALARM

- Grip a door handle and open the door in the usual way (a glove may prevent the function) or press lightly on the larger of the boot lid's two rubberised buttons.

START THE ENGINE

- Depress the brake/clutch pedal and briefly press the **START/STOP** button.

SWITCH OFF THE ENGINE

- Briefly press the **START/STOP** button.

See the owner's manual, section "Locks and alarm", for more information.

WINDSCREEN WIPERS AND RAIN SENSOR*

- 1 Rain sensor On/Off, with the lever in position 0.
- 2 Regulates the sensor sensitivity or the intermittent delay.

| | |
|---|--|
| A | Single sweep |
| 0 | Off |
| B | Intermittent wiper, see also (2) |
| C | Normal sweep speed |
| D | High sweep speed |
| E | Washer, windscreen and headlamps |
| | Illuminates when the rain sensor is active |

AUDIO SYSTEM

- 1 Turn to adjust the volume.
- 2 Press for ON/OFF.
- 3 Press to select **AM, FM1, FM2, DAB1***, **DAB2***.
- 4 Press to select **DISC, USB***, **iPod***, **AUX^A**, **Media BT***, **TV***.

RADIO

- 6 Turn to select station.
For **FM1/FM2** an automatically generated list of the strongest stations is displayed.
- 7 Search station with left/right arrow.
Store the desired station by pressing in one of the numeric keys **0-9** until the display confirms storage.

- 8 Press to select sound pattern, such as **Bass, Treble** or **Surround*** - Turn **TUNE** (6) to adjust.

CD/DVD* player

- 5 Press to eject the disc.
- 6 Turn to change CD track.
- 7 Change CD tracks with left/right arrow.

An iPod^{®B} or MP3 player can be connected to the audio system via the centre console's AUX connection or USB port. An iPod[®] connected to the USB port will also be charged.

RADIO SYSTEM DAB*

The digital broadcasting system, Digital Audio Broadcasting, offers High Quality radio and even more channels.

^A AUX input for e.g. MP3 player (set volume to medium for optimum audio reproduction). AUX audio source volume is adjusted with **TUNE** (6).

^B The iPod[®] trademark belongs to Apple Computer Inc.

AUTOMATIC CONTROL

In **AUTO** mode the ECC system controls all functions automatically, making driving simpler with optimum air quality.

- 1 Turn for the individual temperature on the left/right-hand side of the passenger compartment. The display shows the selected temperature.
- 8 Press for automatic control of selected temperature and other functions.

MANUAL CONTROL

- 2 Heating, left/right-hand seat.
- 3 Max. defroster. Directs all air towards the windscreen and side windows, with maximum air flow.
- 4 Turn to change the fan speed.
- 5 Air distribution.
- 6 Rear window and side mirror defrosters On/Off.
- 7 Recirculation.
- 9 **AC** – Air conditioning On/Off. Cools the passenger compartment and demists the windows.

STORAGE SPACES, 12 V SOCKET & AUX/USB*

The 12 V sockets in the passenger compartment work in key position **0** or **I**. The 12 V socket* in the cargo area is always active.

The car's audio system can playback music from an MP3 player etc. using the AUX/USB* output.

IMPORTANT

Using the 12 V socket in the cargo area when the engine is switched off could discharge the battery.

- 1 Low fuel level. When the lamp is illuminated, fill with fuel as soon as possible.
- 2 T1 & T2 – independent trip meters, which are always active.
- 3 Fuel gauge. The symbol's arrow points out the side on which the fuel cap is located.
- 4 Display, trip computer. Select function with (8).
- 5 Clock. Adjust with (6).
- 6 Turn to end position and hold to set the clock.
One short press switches between T1 & T2.
One long press resets the current meter.
- 7 Press to show/clear message.
- 8 Turn to see the trip computer's options.
- 9 One short press resets the trip computer's current function.
One long press resets all trip computer functions.

i NB

Display text ---- km to empty tank is an estimate of the possible distance left to drive, based on earlier driving conditions.

ADJUSTING THE STEERING WHEEL

! WARNING

Adjust the steering wheel before starting to drive – never do this while driving.

1. Release the catch.
2. Adjust.

BLUETOOTH

1. Makes mobile phone searchable/visible.
2. Hold in the audio system's **TEL** key.
3. Select **Add phone** from the audio system display.
4. Select the phone to be connected.
5. Input the digits shown in the audio system display using the mobile phone's keypad.

CITY SAFETY™ AND COLLISION WARNING WITH AUTO BRAKE*

City Safety™ is a function for helping the driver to avoid a collision when driving in queues, amongst other things, when changes in the traffic ahead, combined with a lapse in attention, could lead to an incident.

The function is active at speeds up to 30 km/h and helps the driver by monitoring the traffic ahead with a laser sensor fitted on the upper part of the windscreen.

City Safety™ can help avoid a collision if the speed difference between your car and the vehicle in front is less than 15 km/h.

If the speed difference is greater then a collision cannot be avoided, but the speed of the initial impact is reduced. City Safety™ is designed to be activated as late as possible in order to avoid unnecessary interventions.

WARNING

The driver is always responsible that the vehicle is driven properly and with a safety distance adapted to the speed.

City Safety™ is a driver tool and can never replace the driver's attention to the traffic or the responsibility to drive the vehicle in a safe manner.

City Safety and Collision Warning with Auto Brake must never be used as a substitute for the foot brake. These functions do not work in all traffic, light, weather or road conditions, and can only see pedestrians who have clear body contouring and are taller than 80 cm. Warnings and brake interventions for pedestrians are switched off above 80 km/h.

ADAPTIVE CRUISE CONTROL*

Do not use the adaptive cruise control in, for example, city traffic, in dense traffic, at junctions, on slippery surfaces, with a lot of water or slush on the road, in heavy rain/snow, in poor visibility, on winding roads or on slip roads.

See the owner's manual, section "Comfort and driving pleasure", for more information about these functions.

EBA – EMERGENCY BRAKE ASSIST

Emergency Brake Assistance helps to increase brake force and so reduce braking distance. EBA is activated when the driver brakes suddenly. When EBA is activated the brake pedal depresses a little more than usual.

– Press (hold) down the brake pedal for as long as necessary – all braking ceases if the pedal is released.

CAR CARE

Handwashing is gentler on the paintwork than an automatic car wash. The paintwork is also more sensitive when it is new. For this reason, handwashing is recommended during the first few months with a new car.

Use clean water and a washing sponge. Remember that dirt and grit can scratch the paintwork.

HEADLAMP CONTROL

- A** Main beam flash
- B** Main/dipped beam switching and Home safe light duration
- Display and instrument lighting
- Rear fog lamp, the light only illuminates on the driver's side
- Automatic dipped beam. Main beam flash working but not fixed main beam
- Parking lamps
- Dipped beam. Switches off when the engine is switched off. Main beam can be activated
- Opens petrol tank cap
- Manual headlamp levelling (automatic for Xenon lights*)
- Unlocking of tailgate

ADJUSTING THE FRONT SEAT

- 1** Lumbar support
- 2** Backrest rake.
- 3** Raise/lower seat.
- 4** Raise/lower the front of the seat cushion.
- 5** Forwards/backwards.
- 6** Lowering the passenger seat backrest.

See the owner's manual, section "Your driving environment", for details.

PARKING BRAKE

To apply

- Press the button. The warning lamp flashes until the parking brake is fully applied – after which the lamp stays on.

To disengage

1. Key position **0** or **I**.
2. Depress the brake pedal and pull the button gently.

Disengage automatically

- Drive away. (For cars with automatic transmission, the seatbelt must be buckled).
